

FOR IMMEDIATE RELEASE:

Tracks – New Update Adds Multiple Trains, Plus the Game Arrives in Multiple Languages

Banbury, Oxfordshire – 15th November 2018

[Tracks – The Train Set Game](#) today receives one of its largest updates yet, delivering the most frequently requested fan feature: multiple trains. Players will now be able to add more than one train to their sets, choosing between trains to drive.

Complementing this feature of multiple trains are junctions. These allow your trains to automatically be guided down different paths, while players build the quirky towns and sprawling countryside of their dreams.

Watch the [brand new trailer](#) to see these additions for yourself.

Tracks – The Train Set Game also today makes its debut in Simplified Chinese, Russian and German. We're thrilled to bring the game to new audiences so that even more players can experience the wonderfully simplistic train set builder. To celebrate, Tracks is 25% off on Steam until 21st November.

A wealth of new objects have also been added, providing further items for players to adorn their towns with, including taxis, buses, scooters, a school bus, a train shed, a wind turbine, a sailboat and a crane.

About Tracks – The Train Set Game

Jump aboard the nostalgia-train! Tracks is the ultimate wooden train game. Construct train sets without rules, deliver cargo (coming soon), and transport commuting passengers. Build the ultimate railway system and then ride it in first person, from the train cab.

Players can create their own elaborate sets in free-play mode, or they can take on objectives, such as creating and running a commuters' system.

Tracks - the Train Set Game has a 90% positive user review rating on Steam as of time of writing.
